Gainesville, Florida

Education

B.S. in Computer Science from University of Florida

Graduated: May 2025

Work History

Baidu, Inc., Software Engineer Intern

May 2024 – Aug 2024

- Engineered a Python + Express.js proxy to support authenticated Baidu Qianfan API access, cutting latency by 20%.
- Built a LangChain.js and Puppeteer pipeline for document scraping and embedding into Chroma DB, speeding up vectorization by 15%.
- Automated testing across OCR, LLM streaming, and backend flows using Jest and Jenkins CI, reducing regressions and boosting reliability.

Projects

QuickFollowUp | AI-Powered Chrome Extension for Job Seekers

May 2025 – Current

- Built a Chrome extension + FastAPI backend to detect job activity and auto-generate follow-up emails via LangGraph.
- Routed job descriptions through OpenAI to generate personalized messages; managed auth/limits with Supabase.
- Designed async pipelines to combine parsed resumes + job data for real-time generation.
(*In progress: caching, Hunter.io integration, deployment*)

YOMI | Japanese Learning Website ([link](#))

January 2025 – March 2025

- Built a full stack app with React, TypeScript, Supabase (PostgreSQL + Google OAuth), deployed via Vercel.
- Developed a Playwright-powered quiz game for personalized learning content.
- Created a SQL-triggered real-time leaderboard and normalized schema with transaction-safe logic.

AI Wellness Assistant for Product Support

February 2025 – May 2025

- Developed a LangGraph-based LLM router for product, support, and symptom queries.
- Embedded 100+ product pages into ChromaDB using HuggingFace embeddings for RAG-based retrieval.
- Built a FastAPI + Ollama backend and React frontend with real-time mode switching.
